Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 11, and 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Farmer (6,662,093).

Farmer discloses an apparatus for controlling an airbag, comprising: a camera (22) configured for obtaining an image of a viewable field within the passenger compartment of the vehicle; at least one pattern associated with vehicle structures located within the viewable field (any background object can broadly be considered a pattern, such as the seat fabric); means for removing portions of the obtained image associated with vehicle structures having the pattern so as to obtain information regarding occupancy of the viewable field (see column 4, lines 55-65); and means responsive to the obtained occupancy information for controlling the occupant protection system (see, for example, Figure 3, steps 55 & 32).

Regarding claim 2, there are inherently two patterns (see for example, Figure 3, at step 38).

Regarding claim 3, the segmentation subsystem detects the pattern in the obtained image (see column 4, lines 60-65).

Allowable Subject Matter

3. Claims 12 and 21 are allowed.
4. Claims 4-10 and 16-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baloch et al. shows an occupant classification system for airbag deployment. Krumm shows a video occupant detection system. Breed et al. shows an image processing system. Aoki et al. shows an image extraction method using a dye.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Dunn whose telephone number is 703-305-0049. The examiner can normally be reached on Mon-Thur, alt. Fridays, 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 703-308-2089. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
